ANIMALS (Care, Service, & Pets)

*Tips: Assistance or **service animals** are trained for specific work or tasks that benefit an individual. Do not pet service animals, as it distracts from their work.*

*Animals not so trained (**companion animals**, emotional support animals, or pets) do not qualify for accommodation in public places & services, nor private transportation. May require animal be in carrier.*

Prepare for disasters by locating friends, motels or shelters that take pets, microchip and photograph pet, assemble carrier, adequate food and water, leashes, medicines, etc. Inquire in advance about care of livestock.

CHURCHES/ RELIGIOUS/ SPIRITUAL ORGANIZATIONS

Tip: Faith groups may hold services via broadcast, virtual, or require appointment for in-person gatherings.

Beyond spirituality, faith groups provide social opportunities. Several hold health & safety programs, share garden produce, provide safety nets (help with shopping, transportation, cash assistance, shelter etc.) Ministries may do grief counseling, visit the sick & homebound. Contact to find out if programs are limited to members, or have other eligibility requirements.

*Scams

Tips: Beware of contacts you did not originate, & emails with only link & name of supposed sender.

Scams typically urge immediate action, then ask for your Address, Banking information, Account Numbers, Passwords, Remote Access to your computer, demand immediate payment money order, wired money, or prepaid card (according to state & federal justice programs).

Scams may have mismatched email addresses of origin & destination addresses. The destination address is between the second-to-last-dot and the first slash of the URL.

Shred anything with names, phone, email, address, account numbers & personal information.

*Dial *77 to prevent receiving Private Caller lacking a phone number.*

Keep purses out of view of windows (car & home).

DEATH & DYING (see also Grief & Bereavement, Donors)

***Advanced Care Planning (ACP)**

Tip: Give a copy of your advance directives or living will to your physician & health care representative.

Review your advance directives periodically for changes in your goals and your health care representative to guide future in-the-moment decisions.

Be aware that recent evaluations of ACP question its' worth, as ACP did not meaningfully improve quality of life & failed to improve end-of-life care. (R.S. Morrison et al, "What's Wrong With Advance Care Planning," JAMA, 10-8-21)

The Health Care Decisions Act of Oregon pre-authorize a health care representative to allow the natural dying process in event of permanent unconsciousness, advanced progressive illness, extraordinary suffering, or close to death. [website](#)

EXERCISE

***Guidelines**

Centers for Disease Control

People age 65+ should exercise regularly to prevent health problems, strengthen muscles, & enable doing daily activities without becoming dependent. Minimum is 150 minutes per week of moderate intensity aerobic activity, such as brisk walking, or 75 minutes per week of intense aerobic activity, such as jogging, or an equivalent mix of the two.

How much physical activity do older adults need?

***Walking**

Tips for walking: Wear bright colors, carry a flashlight

Keep hydrated.

40% of pedestrian fatalities involve pedestrian alcohol.

Centers for Disease Control

Generally, walking 30 minutes a day improves blood pressure, blood sugar, weight, mental health & mood, ability to do daily activities, prevent falls, & lower your risk of heart disease.

Studies of older women show increasing walking by 2,000 steps a day (less than mile) yields positive health outcomes. 4,400 steps is even better.

FALL PREVENTION (see also Housing Repair)

Tips: When climbing a ladder, set the ladder at 75.5 angle, wear a bicycle helmet or hard hat.

Risk of falling from ladder & severe head injuries rises after age 50.

Change positions slowly from lying down, sitting, to standing, especially if taking blood pressure pills or diuretics.

Use reaching devices. Avoid footwear that slides on floors.

Don't rush to answer a phone. Avoid, or anchor small area rugs.

Clean-up clutter.

Use adequate lighting.

Progressive lenses may contribute to falls.

Enter & exit buses using secure handhold

***Alcohol**

Dietary Guidelines for Americans. 2020-2025

states to choose not to drink, or drink in

moderation (2 drinks or less for men, 1 or less

for women). One drink is 12 oz. of beer,

5 oz. of wine, or 1.5 oz. of distilled spirits).

Drinking less is fewer calories. Even moderate

use poses risks with interacting medications,

liver disease, or driving/operating machinery. [website](#)

Oregon Liquor & Cannabis Commission

Oregon law ORS 813.010 specifies 0.08% [website](#)

or more blood alcohol, or intoxicating liquor,

inhalant, or controlled substance constitutes driving **under the influence**. Increases risk of crash four-fold.
Below 0.08% blood alcohol still raises risk.

GUNS (see also Self-Defense)

Tips: Lock-up all fire arms. Put safety lock on guns. Avoid access by grandchildren or others.

Wear earplugs or ear muffs when shooting a gun.

Consider selling your guns to responsible party, giving to heirs now, or donating to a museum.

Assisted Living facilities may not allow guns on their premises.

Consider changes in cognition, behavior, dementia (including Alzheimer's disease), emotional state, eyesight, frailty, & reaction time in decision whether to retain guns.

Older people are less apt to be victim of violent crime. The elderly complete more suicides with guns.

HEALTH CARE PROVIDERS (doctors & other health professionals)

(See also Exercise, Hearing, & Vision)

Tips: Verify whether your provider accepts your insurance, especially the Oregon Health Plan, Medicaid, and traditional Medicare.

Find out if your practitioner now offers Telemedicine visits,

Health care providers may individually mandate masks.

Wearing masks is good practice whenever you have any respiratory problem, not just for COVID-19 or pandemics.

Some insurers explain their plans
at Silverton Senior Center, prior to enrollment periods.

HEARING, HEARING AIDS, & SPEECH

Tips: By age 75, half of adults have disabling hearing loss. They may miss hearing others, or mishear what was said.

Check for obstruction due to earwax.

Earbuds or earphones are not designed to assist hearing loss.

Devices to improve hearing include personal sound amplification that amplifies all sound. These are electronic products. Amplified phones are available. Amplifiers are not regulated by FDA.

Hearing Aids are regulated by FDA as a medical device. Most are just registered with FDA. Those classified as Class II medical device, such as self-fitting hearing aids, must additionally show safety and efficacy data to obtain FDA clearance. Some aids are now available Over-The-Counter for mild to moderate hearing loss. Others require a prescription from an audiologist.

Compare cost, insurance coverage, battery life, warranty period, features, fit, comfort, ease of handling, and company support.

When putting on or taking off face masks, check that your hearing aid is still in place; or wear a face shield.

Check if your medications may cause ringing in ears, or hearing loss.

Under the Americans with Disabilities Act, individuals with hearing loss can get access for phone service (not necessarily for the phone).

TRANSPORTATION Road Conditions

Oregon Department of Transportation
TripCheck road conditions & traffic alerts

511
[website](#)

***Driving Yourself**

Drivers age 65 and over comprise nearly 25% of drivers. Older drivers are more apt to use seat belts, limit driving at night & during bad weather, & less likely to drive under the influence (Centers for Disease Control & the National Highway Transportation Safety Administration).

Drivers age 75-79 have 2.5 times risk of fatal crash, age 80 and above have 5 times the risk. Risk rises with medication use, impaired vision, cognition, and grip strength, and slower reaction time. Dementia, stroke, Parkinson and other conditions may impair driving. Errors occur more during merging, changing lanes, turning left, & at intersections.

Reduce distractions (turn off cell phone and radio, eating or drinking while driving) may reduce your risk. New technology may lower the risk of crashes.

Tips: Safe driving by older drivers include:

Plan your drive.

Avoid distractions, as phones, eating & drinking.

Open window slightly to better hear traffic.

GPS may be safer than map unless second person is navigator.

Allow adequate space between vehicles.

Be vigilant of pedestrians & cyclists in dark clothing.

If you wear glasses, consider anti-reflective coating; but

Do not wear so-called “night driving glasses” (amber/yellow) that may reduce visibility.

*Consider **mobility accessible vehicles** or conversions if appropriate.*

***Retain, Extend, & Improve Driving Skills**

***Parking**

*Tips: Parking designated for persons with disabilities are only for them.
Some handicap parking is for wheelchair users only.
Space designated for senior citizens at some establishments & parks.*

Oregon Department of Motor Vehicles (DMV)
Parking Permits for Disabled &
for Wheelchair users [website](#)

***When You Drive**

Tips: Drugs (medications, supplements, herbs, or recreational) may impair your alertness, reaction time, judgment, cognition, due to causing confusion, dizziness, drowsiness, or vision changes. Find out if your drugs may do this. These span alcohol, allergy pills, pain medication, motion sickness, & overactive bladder medication.

Oregon Department of Transportation &
Oregon Health Authority
Oregon law ORS 813.010 specifies 0.08%
or more blood alcohol, or intoxicating liquor,
inhalant, or controlled substance constitutes
driving **under the influence**. Increases risk
of crash four-fold. Below still increases risk. [website](#)

***Signs To Stop Driving**

Tips: People living in rural areas need to consider distances driven and availability of alternative transportation when considering stopping driving.

AARP Driver Safety
“Conversations with someone having
driving problems” [website](#)

Healthwise 800-706-9646
Driving Decision Aid

Increases knowledge & certainty, decreases conflict in older drivers about whether & when to stop driving.

2601 N. Bogus Basin Rd., Boise ID

[website](#)

National Institute on Aging (NIA)

Signs to stop driving

- Get lost on roads that know
- Other drivers honking at you
- Involvement in “fender benders”
- Vehicles & pedestrians appear out of nowhere
- Distracted while driving
- Others concerned about your driving.

VISION & EYE CARE (See also Animals, Service)

*Tips: Improve your visibility to others on dark days & nights by **wearing**
white, pink, light blue, green, yellow, orange & reflective wear. Carry a*

flashlight. Your eyes need about 45 minutes for 80% recovery from bright to dim light. Cataracts worsen glare. Smoking worsens night vision.

Consider reading aids, such as magnifying glasses & e-book readers.

Ask your pharmacist for prescriptions labels & drug information that follow guidelines developed by the American Society of Consultant Pharmacists Foundation & the American Foundation for the Blind.

***Ophthalmology**

Magnifying Glasses

Assist seeing small print & detail of labels
(prescription, food) & hobbies.

Features span magnification (1x-45x),
hand held, wearable (headband, glasses, free-
standing lamp), shape, & weight.

Optical glass may be unbreakable, anti-scratch.

Some are lighted & require batteries.

Some businesses hang magnifying glasses
about every 12 feet to aid reading labels,

for example, Rite-Aid

WEATHER

***Air Quality**

Tip: Limit exposure to smoke & drink plenty of water.

Forest fires, field burning, & smoking may aggravate asthma, breathing, heart conditions, lung problems, cause cough, headaches, irregular heartbeat, heart attacks, & irritate eyes.

During wildfire smoke the EPA advises avoiding indoor smoking, frying, broiling, burning candles or incense, or vacuuming without a HEPA filter.

Oregon Department of Environmental Quality 503-229-5359
Air quality index

[website](#)

Oregon Smoke
blog information about air quality

[website](#)

***Cooling Centers**

During very hot weather, organizations may provide cooling centers.

Tips: Heat exhaustion & heart stroke may occur during high temperatures, especially for those with heart or respiratory disease, or taking certain medications.

Consider the hours the center closes, and temperatures you will encounter en-route.

Check that your fan and air condition are working.

Recognize risk rises when you are older, lack air conditioning, live alone, living outside, in a car, mobile home, recreational vehicle, or multi-family units.

Heat islands form around paved parking lots, railroads, and industrial areas. Overheating remains dangerous during the night.

Older people, more prone to heat stress, should drink plenty of water.

If you are on the Oregon Health Plan or a client of Meals on Wheels inquire whether they have donated air conditioners or fans available.

Effects from low fluid intake and depletion of electrolytes may occur in week after the heat wave.

If you are in the sun when it is 90 F. and above, consider using a mineral sunscreen, such as zinc oxide.
